

## Newly Developed DYNAFORM 5.6

### Features and Functions

Arthur Tang, Jeanne He

Engineering Technology Associates, Inc.

#### **Summary:**

DYNAFORM has been evaluated through out last 12 years in 5 major overhauls. DYNAFORM 5.6 is the latest major overhaul with incremental improvements and enhancements in the areas of Overall GUI reorganization, enhanced DFE features & functions, AutoSetup for Multiple-Stages applications, Springback Compensation (SCP) and seamless integration with LS-971 in supporting SCP solver and \*Case\_Control\_Card for multiple-stages applications.

The post-processing aspects of the improvements and enhancements are also developed to match the rapid advancement in pre-processing and solver.
